Fullscript
Integrate

What you can expect
with development

The following is our step-by-step guide on what to expect when collaborating with the Fullscript integration team. Please reach out if you need support with any of the steps throughout the process.

01
Read through our detailed **build guides** and technical reference to plan your build

02
Create a Sandbox **application** and begin to code up your integration

04
Once you're feeling satisfied, **submit your application for review** and book a time with one of our implementation specialists

03
Create a US and/or Canadian **application** if you service clients in both geographies

05
After feedback and approval, you can **create your Production App(s) on the Fullscript API Dashboard**

06
Update your code to reflect the switch to a production application

07
Go-live: Request to publish your integration listing within our in-app integrations page (visibility to our vast practitioner user base) and arrange the co-marketing efforts with the team at Fullscript

What you can expect
with contracting

01
Accept the API License Agreement to access the Fullscript API (required)

02
Connect with Fullscript's Integrations team to:

- ☑ **Complete HIPPA** Subcontractor Business Associate Agreement (sub-BAA) (required)
- ☑ **Complete Insurance Addendum** (required)
- ☑ **Explore opportunities for deeper collaboration** including marketing & education. Special Commercial terms available on a partner-to-partner basis. (optional)
